

COLLEGE CATALOGUE

1. Introduction

Greetings from President

President ISHIHARA Sotomi

Education Philosophies

Originality and Creation

Autonomy and Independence

Coexistence and Symbiosis

In October, 2009, National Institute of Technology, Toyama College was established by integrating two national technical colleges, Toyama National College of Technology and Toyama National College of Maritime Technology, which located in Toyama Prefecture at the time.

Our college has six departments: (1) Department of Mechanical Engineering, (2) Department of Electrical and Control Systems Engineering, (3) Department of Applied Chemistry, Chemical Engineering, (4) Department of Electronics and Computer Engineering, (5) Department of International Business and (6) Department of Maritime Technology. Four of them are engineering departments, one is a liberal art department and one is a maritime department. So, our college has many (three) different education fields. This is quite unique and favorable to us compared to other colleges in Japan.

National Institute of Technology, Toyama College has three education philosophies: “Originality and Creation,” “Autonomy and Independence” and “Coexistence and Symbiosis.” The meaning of the first one is thinking about new ideas and things and then making them by self. The second one means always acting voluntarily and persevering to achieve something with patience. And the third one means acknowledging others and coexisting with them.

National Institute of Technology, Toyama College conducts five-year of consistent education in order to equip the students with a deeper understanding and provide practical skills under the education philosophies mentioned above. For example, in academic departments, general liberal arts courses including humanities and social sciences, and the specialized courses that require experiments and practical training and exercises in professional fields are also conducted. Four engineering departments develop engineers with basic technologies for a wide range of fields and with a problem solving abilities that are appropriate for the industry requirements. Department of International Business develops business graduates who can contribute to local communities and local industries, and Department of Maritime Technology develops human resources who can play an active role as ship officers in-charge of shipping circles of Japan.

In all these fields, in order to develop human resources who offer a global perspective and can internationally play an active role, we provide overseas training, cross-cultural experience, overseas internships and other programs in cooperation with higher education institutions located in America, Europe and Asia.

In National Institute of Technology, Toyama College, all teaching faculty members continuously strive to earn the admiration of local people and to become a trusted higher education institution.

We would like your continuous guidance, support and valuable feedback.

Educational Objectives

1. Development of human resources with both specialized knowledge and skills that can contribute to promote research and development and business in the future.

The objective of the National Institute of Technology, Toyama College is “Development of creative human resources with practical and specialized knowledge and skills.” To attain this objective, we educate each student to meet their hope and at the same time respond to the needs of society. Particularly, we develop human resources that can play an active part in both research and development and local business.

2. Development of human resources with the ability to think by themselves and act independently.

Our college develops human resources that can think by themselves and act independently utilizing technology. For making better society, it is important to communicate your ideas with others and act by cooperating with people around you.

3. Development of human resources with a broad education, with sense of ethics, and with the spirit of coexistence with others.

In order to play an important role in the fields of both research and development and business, it is essential to understand the effects of technology and business on society and nature, and to acknowledge the responsibilities of both engineers and business persons. Therefore, we develop human resources that respect the ethics of engineers and possess the spirit of coexistence with nature and the earth.

Admission Policies for the Program of Associate bachelor’s Degree

This college respects the individuality of each student and helps each one to acquire his/her capabilities through its well-developed cultural education as well as its practical and specialized education. The program that we offer will be given to students from the viewpoint of the Sea of Japan Rim Region.

Based on the above policies, each department seeks the following students who demonstrate consideration for people, society, nature and the environment:

Department of Mechanical Engineering

1. Students who are interested in machines, structures and mechanical systems
2. Students who want to become mechanical engineers with a fertile creative mind
3. Students who want to create systems from energy to recycling and contribute to society

Department of Electrical and Control Systems Engineering

1. Students who are interested in manufacturing such as electronic work and mechanical work
2. Students who want to acquire integrated knowledge of electronics, machinery and information technology; which is required in such as robot technology
3. Students who want to be engineers with the ability to think by themselves and act independently, and contribute to society

Department of Applied Chemistry and Chemical Engineering

1. Students who are interested in the world of chemistry
2. Students who aim to develop harmless manufacturing method for earth and people
3. Students who want to contribute to building a sustainable society

Department of Electronics and Computer Engineering

1. Students who like manufacturing and are interested in computers
2. Students who want to acquire integrated technology of information, electronics, and communication
3. Students who want to become engineers that can think by themselves and act independently, and to contribute to society

Department of International Business

1. Students who are interested in foreign languages and different cultures
2. Students who want to acquire knowledge of business fields
3. Students who want to play active roles in society with a global perspective

Department of Maritime Technology

1. Students who respect oceans and nature
2. Students who aim to become captains or chiefs of a vessel
3. Students who aim to become engineers of large machinery
4. Students who want to play active roles in countries all across the world

Admission Policies for Advanced Course

The Advanced Course aims to develop human resources that have a broad education and sophisticated specialized knowledge. Based on the above policies, each advanced course seeks the following students:

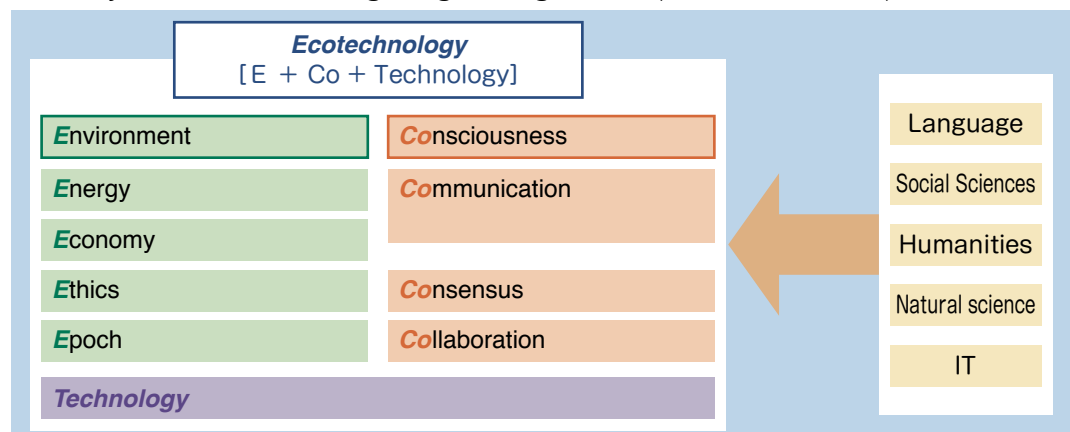

1. Students who want to improve their specialized basic academic skills, and further acquire design abilities that can be obtained with association with practical skills and multifaceted way of thinking
2. Students who want to acquire the ability to conduct research and development and who can continuously make an effort to solve a problem
3. Students who respect ethics as members of society and want to contribute to society as specialists with a global perspective

Educational Program for JABEE

The ECOdesign Engineering Course and Control Information Systems Engineering Course of the Advanced Course provide the following educational programs with students. These educational programs have been approved by the Japan Accreditation Board for Engineering Education (JABEE). Students of these two courses are required to complete a course of these educational programs.

ECOdesign Engineering Program (Hongo Campus)

The ECOdesign Engineering Course provides the educational program, "ECOdesign Engineering", with students. This program is carried out in the fourth and fifth years in three departments, mechanical engineering, electrical and control systems engineering, and applied chemistry and chemical engineering, and in the first and second years in the ECOdesign Engineering Course (Advanced Course).

Control Information Systems Engineering Program (Imizu Campus)

The Control Information Systems Engineering Course provides the educational program, "Computer Systems Engineering (CSS) 2008", with students. This program is carried out in the fourth and fifth years in Department of Electronics and Computer Engineering, and in the first and second years in the Control Information Systems Engineering Course (Advanced Course).

■ External (third-party) evaluation on education system

1 Accreditation by the National Institution for Academic Degrees and University Evaluation

National Institute of Technologies (Colleges) are required to be periodically evaluated by the evaluation organizations that has officially certified by the Minister of Education about enforcement situations of both education and research.

Before unification of our college in 2009, Toyama National College of Maritime Technology and Toyama National College of Technology were audited in 2005 and 2007, respectively, for accreditation as a high educational institution and received certification that the evaluation standards for the high educational institution had been met.

The accreditation is conducted for the following purposes, and the evaluation results and the self-evaluation statements are published on the website to provide the status of educational and research activities of our college to society.

1. To assure the quality of educational and research activities of colleges by periodically evaluating colleges according to the evaluation standards, which were prescribed by the National Institution for Academic Degrees and University Evaluation.
2. To improve the educational and research activities of the college by sending back the evaluation results to each college.
3. To promote the public's understanding that a college has been established and operated as a public institution by clarifying and publishing educational and research activities of the college.

2 Review of Advanced Course by the National Institution for Academic Degrees and University Evaluation

This college has four advanced courses corresponding to six departments: ECOdesign Course, Control Information Systems Engineering Course, International Business Course, and Maritime System Engineering Course.

The education system of advanced course receives a review by the National Institution for Academic Degrees and University Evaluation every five years. Our advanced courses were reviewed and certified in 2009.

As for the three courses, ECOdesign Engineering Course, Control Information Systems Engineering Course and Maritime System Engineering Course, the accreditation based on the special application related to conferment of a bachelor's degree has been provided by the National Institution for Academic Degrees and University Evaluation.

Thanks to the accreditation based on the special application, for the student of the above stated three courses who entered this college after 2014, tests related to academic results will not be conducted and documents to be submitted will be simplified in application of conferment of a bachelor's degree.

And as for the International Business Course, we propose a special application certification in the school year of 2015.

3 Review by Japan Accreditation Board for Engineering Education (JABEE)

Advanced Course provide the ECOdesign Engineering Course and Control Information Systems Engineering Course with students. These two programs are carried out in the fourth and fifth years of the associate bachelor's course, and in the first and second years of the Advanced Course. These educational programs have been approved by the Japan Accreditation Board for Engineering Education (JABEE). The former was approved in 2004 and was certified again in a continuing review in 2009. The latter was approved in 2008, and was certified again in a continuing review in 2014. Students of these two courses are required to complete courses of these educational programs.

4 Certification Review of Department of Maritime Technology as STCW Educational Institution

The education program of the Department of Maritime Technology aims to acquire a maritime officer's certificate (International standard) at the time of graduation, and is reviewed by the Ministry of Land, Infrastructure, Transport and Tourism every five years. The Ministry of Land, Infrastructure, Transport and Tourism reviews and certifies that education programs of the educational institutions for maritime officers in Japan meet STCW (Standards of Training, Certification and Watch keeping for Seafarers) and reports the status to IMO (International Maritime Organization). The Department of Maritime Technology of the National Institute of Technology, Toyama College is certified as a proper educational institution for maritime officers by the Quality Standard System according to STCW.

History of National Institute of Technology, Toyama College

History of Toyama National College of Technology (Prior to 2009)

April 1964	Toyama National College of Technology, consisting of the Department of Mechanical Engineering, Electrical Engineering and Industrial Chemistry, established
April 1969	Newly established Department of Metallurgical Engineering
April 1989	Department of Industrial Chemistry was reorganized into the Department of Chemical and Biochemical Engineering
April 1993	Advanced Courses with a Mechanical and Electrical System Engineering Course and Functional Materials Engineering Course, established.
October 1994	Toyama National College of Technology, 30th anniversary The 1st ASIAN SYMPOSIUM ON ECOTECHNOLOGY-Toyama '94
April 1995	Department of Metallurgical Engineering reorganized into the Department of Ecomaterials Engineering.
April 2004	Toyama National College of Technology, Institute of National Colleges of Technology (Independent Administrative Corporation) established
May 2005	School Education Program (ECOdesign Engineering) accredited by JABEE (Japan Accreditation Board for Engineering Education)
October 2007	14th ASIAN SYMPOSIUM ON ECOTECHNOLOGY at KyungHee University in Korea (Sponsor: Institute of National Colleges of Technology, Managed by: Toyama National College of Technology)
November 2007	School Activates for "EcoAction 21" authorized and registered by the Institute of Global Environmental Strategies Center for Sustainability
March 2008	School Curriculum certified as a College of Technology Accreditation by the National Institution for Academic Degrees and University Evaluation

History of Toyama National College of Maritime Technology (Prior to 2009)

July 1906	Shinminato First Grade Mercantile Marine School established
April 1909	Transfer of administration to Toyama Prefecture
August 1939	Renamed Toyama Prefectural Marine School Transfer of administration to the Ministry of Education
June 1967	Renamed Toyama National College of Maritime Technology (Department of Nautical Engineering and Department of Marine Engineering)
March 1969	Location changed to the present campus (Ebie Neriya, Imizu City) Size of Department of Nautical Engineering increased by one class
April 1985	Two classes of the Nautical Engineering Department reorganized into one Department of Computer Engineering established
April 1988	Departments of Nautical Engineering and Marine Engineering combined into the Department of Maritime Technology (Nautical Science and Marine Engineering courses) Department of Electronics and Control Engineering established
April 1996	Department of International Trade and Transport established
April 2004	Toyama National College of Technology, Institute of National Colleges of Technology (Independent Administrative Corporation) established
April 2005	The Advanced Course established (Maritime System Engineering, Control Information Systems Engineering)
March 2006	School Curriculum certified as a College of Technology Accreditation by the National Institution for Academic Degrees and University Evaluation
October 2006	100th Anniversary ceremony held
April 2009	School Education Program (Control Information Systems Engineering) accredited by JABEE (Japan Accreditation Board for Engineering Education)

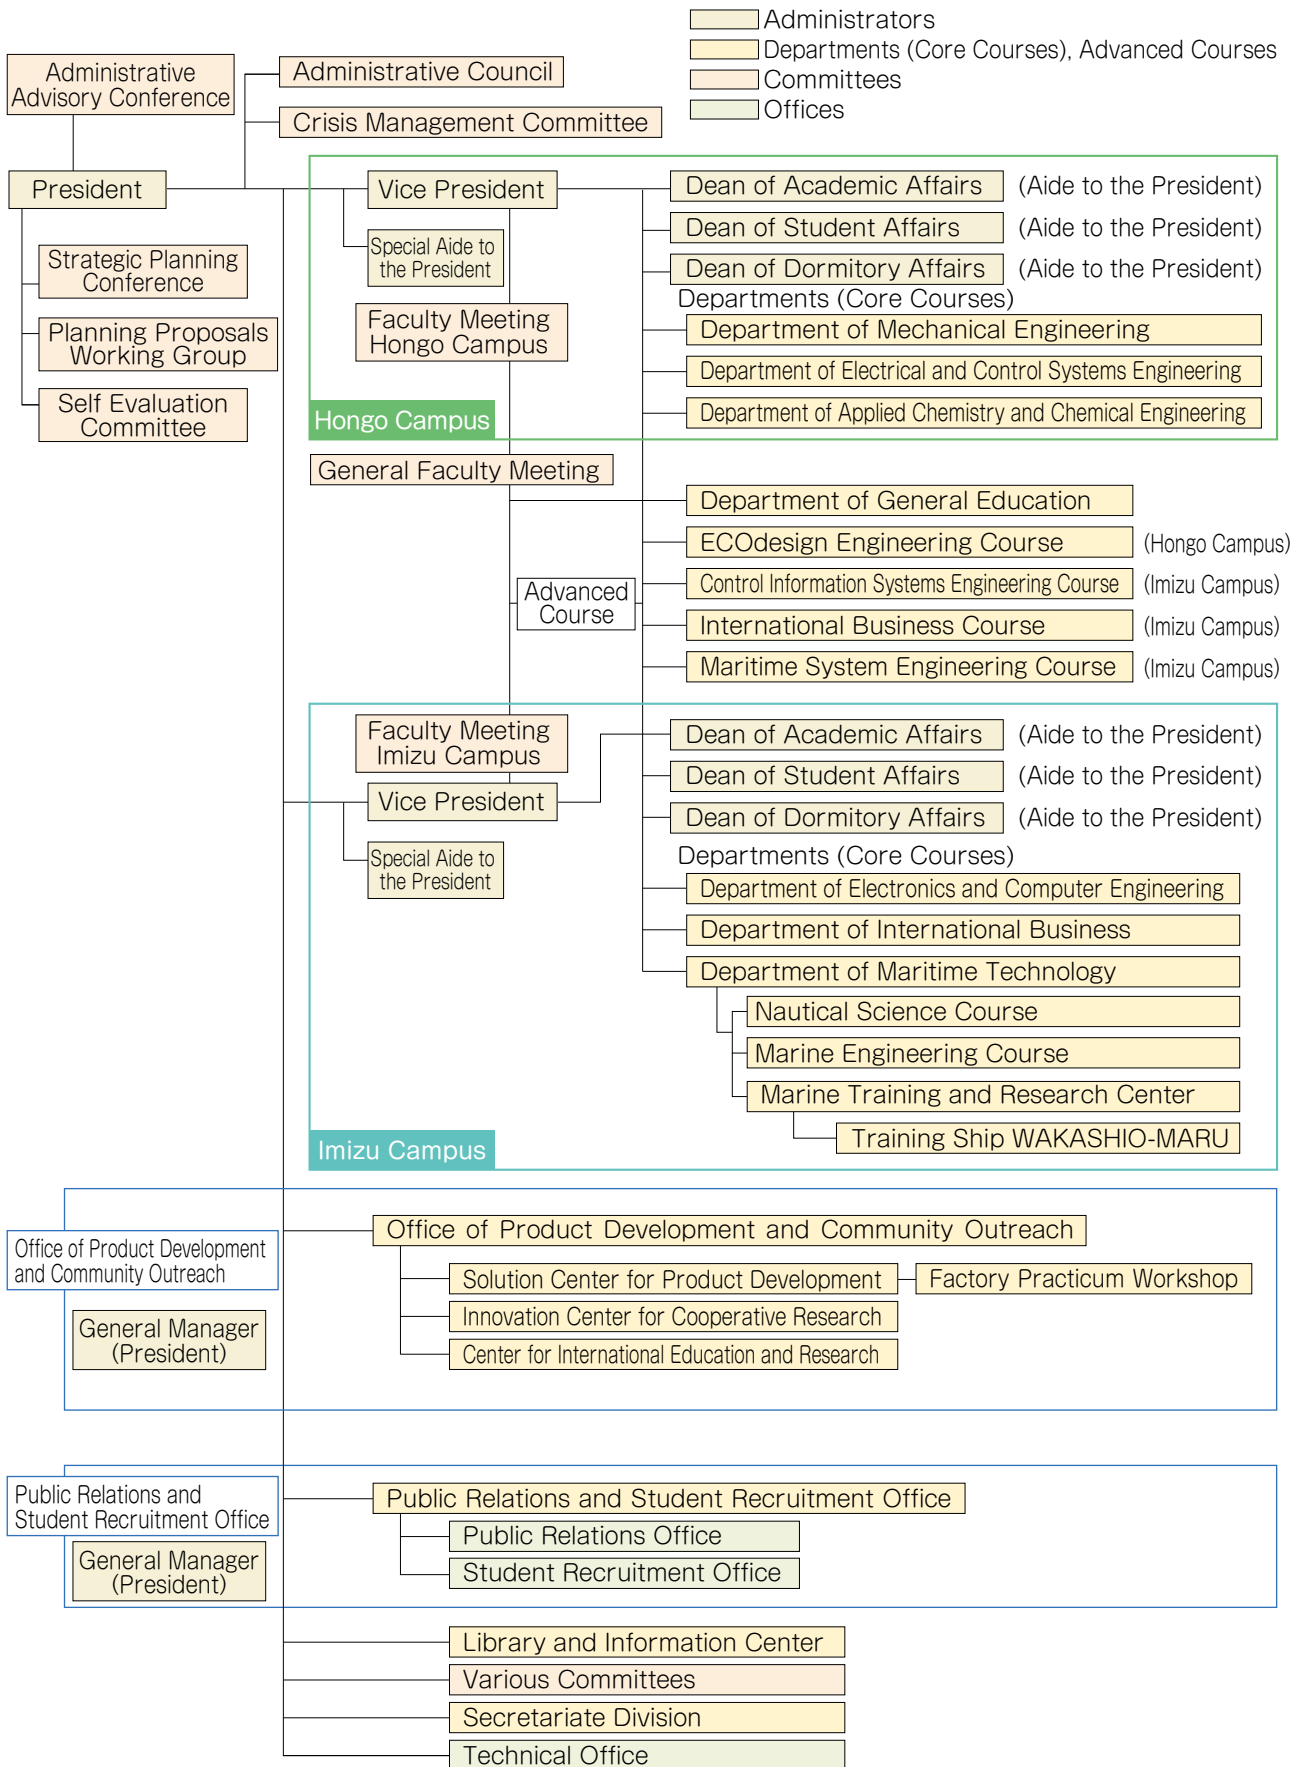

History of National Institute of Technology, Toyama College

October 2009	National Institute of Technology, Toyama College established (Department of Mechanical Engineering, Department of Electrical and Control Systems Engineering, Department of Applied Chemistry and Chemical Engineering, Department of Electronics and Computer Engineering, Department of International Business, Department of Maritime Technology and Advanced Course)
April 2010	New students of Core Course and Advanced Course start school
March 2015	First graduation ceremony held for the first year's intake (2010) for the new school

2. Organization

Organizational Chart

Administration Staff

As of May 1, 2015

President	ISHIHARA Sotomi
Vice President (Hongo Campus)	NISHIDA Hitoshi
Vice President (Imizu Campus)	SHINKAI Junko
Special Aide to the President	NARUSE Yoshinori

Hongo Campus

Dean of Academic Affairs (Aide to the President)	NISHI Toshiyuki
Dean of Student Affairs (Aide to the President)	AOYAMA Akiko
Dean of Dormitory Affairs (Aide to the President)	TAKAKUMA Tetsuya
Department Chair, Mechanical Engineering	TERANISHI Tsunenobu
Department Chair, Electrical and Control Systems Engineering	SHIBATA Hiroshi
Department Chair, Applied Chemistry and Chemical Engineering	GOTO Michimasa

Imizu Campus

Dean of Academic Affairs (Aide to the President)	NAKATANI Toshihiko
Dean of Student Affairs (Aide to the President)	TSUKADA Akira
Dean of Dormitory Affairs (Aide to the President)	TOGA Shinji
Department Chair, Electronics and Computer Engineering	MIZUMOTO Iwao
Department Chair, International Business	NISHIHARA Masahiro
Department Chair, Maritime Technology	MIZUTANI Junnosuke
Chief, Nautical Science Course	CHIBA Hajime
Chief, Marine Engineering Course	MIZUTANI Junnosuke
Director, Marine Training and Research Center	CHIBA Hajime
Captain, Training Ship	NAKAGAWA Hiroshi

Advanced Courses

Dean of Advanced Courses (Aide to the President)	OKANE Masaki
Assistant Dean, Advanced Courses (Hongo Campus)	OKANE Masaki
Assistant Dean, Advanced Courses (Imizu Campus)	ASO Tsukasa

Department of General Education

Department chair, General Education	OKABE Hiroko
Chief, General Education (Hongo Campus)	TOMITA Takashi
Chief, General Education (Imizu Campus)	OKABE Hiroko

Office of Product Development and Community Outreach

General Manager, Headquarters for Product Development and Community Outreach	ISHIHARA Sotomi
Director, Solution Center for Product Development	NISHIDA Hitoshi
Director, Innovation Center for Cooperative Research	TAKADA Eiji
Director, Center for International Education and Research	NARUSE Yoshinori

Public Relations and Student Recruitment Office

General Manager, Public Relations and Student Recruitment Office	ISHIHARA Sotomi
Manager, Public Relations Office	SATO Keisuke
Manager, Student Recruitment Office	HASEGAWA Hiroshi

Library and Information Center

General Manager, Library and Information Center	KAWAFUCHI Hiroyuki
Chief, Library and Information Center (Hongo Campus)	KAWAFUCHI Hiroyuki
Chief, Library and Information Center (Imizu Campus)	SHIMIZU Yoshihiko

Secretariate Division

General Secretary	HAYASHI Koichi
Manager, General Affairs Division	KOBAYASHI Masayuki
Manager, Financial Affairs Division	NISHINO Shinichi
Manager, Student Affairs Division (Hongo Campus)	ISHIDA Yoshikuni
Manager, Student Affairs Division (Imizu Campus)	YAMADA Yutaka

Technical Office

Manager, Technical Office	NISHIDA Hitoshi

3. Departments

Department of Mechanical Engineering

Department of Mechanical Engineering Educational objectives

To develop engineers who comprehensively acquire knowledge, focusing on mechanical engineering as the basis of manufacturing and production technology and play a role in equipment design, technology development and other engineering-related fields.

To develop engineers who acquire knowledge focusing on machinery and systems, mechanical materials, design and production, dynamics, energy measurement and control, and apply them to problem solving.

To develop engineers with a great amount of creative energy and an inquiring mind who acquire the ability for mechanical engineering thought and can develop and apply new technologies and new materials from a comprehensive perspective to basic system construction.

Department of Electrical and Control Systems Engineering

Department of Electrical and Control Systems Engineering

Educational objectives

To develop engineers who comprehensively acquire electrical, mechanical and information technology engineering and can creatively develop new technologies.

To develop engineers who integrate specialized knowledge focusing on electricity and machinery that are the pillars of engineering.

To develop engineers who acquire the ability to think based on electrical and mechanical engineering and can carry out "manufacturing" based on mathematics, physics and chemistry.

Department of Applied Chemistry and Chemical Engineering

Department of Applied Chemistry and Chemical Engineering

Educational objectives

To develop engineers who have knowledge focusing on a wide range of fields such as nanomaterials, functional materials, polymeric materials and eco-technology and having a deep knowledge of the most advanced technology based on chemistry and biochemistry.

To develop engineers who have the ability to plan and carry out the development and improvement of environment-friendly, organic / inorganic materials and energy-related materials and environmental protection technologies and the high ethical standards for engineers.

To develop engineers who can contribute to the development of chemical / pharmaceutical industries and the polymeric industry that are significant locally, protect and improve the building of a sustainable society and the Sea of Japan Rim Region environment.

Department of Maritime Technology

Department of Maritime Technology Educational objectives

To have students acquire specialized knowledge necessary as a vessel specialist.

To develop professional abilities through experiments and practical training for control and construction of systems in the maritime field.

To have students acquire a code of etiquette and seamanship necessary for good operation of vessel systems through practical training and discipline.

To develop knowledge, skills and the basis of management skills for development of professional applied skills.

(*1) "Physics I" (2 credits) is a mandatory course and "Chemistry I" (2 credits) is an elective course in the Department of Mechanical Engineering, Department of Electrical and Control Systems Engineering and Department of Electronics and Computer Engineering.

"Chemistry I" (3 credits) is a mandatory course and "Physics I" (2 credits) is an elective course in the Department of Applied Chemistry and Chemical Engineering.

(*2) "Basic Science Experiments" (1 credit) is a mandatory course in the Department of Mechanical Engineering, Department of Electrical and Control Systems Engineering and Department of Electronics and Computer Engineering.

"Basic Chemical Experiments" is not offered in the Department of Applied Chemistry and Chemical Engineering.

(*3) Health and Physical Education

4. Advanced Courses

The Advanced Courses consists of engineering courses of the “ECOdesign Engineering Program” and the “Control Information Systems Engineering Program”, a humanities course of the “International Business Program,” and a maritime course of the “Maritime System Engineering Program”, which develops human resources who develop a broad education and advanced specialized knowledge.

ECOdesign Engineering Course

The ECOdesign Engineering Program conducts advanced and complex education focusing on basic academic skills related to mechanical systems engineering, electrical and control systems engineering and applied chemistry and chemical engineering and other engineering-related fields obtained in the education of higher professional school based on the foundation that all technologies should be environment-friendly and provides common courses such as environmental engineering, environmental sociology, engineering ethics and measurement / control for students to develop into creative engineers having a spirit of coexistence.

Control Information Systems Engineering Course

Control Information Systems Engineering Program develops professional engineers who acquire technologies for software, electricity / electronics and networks and who can design a system in which they are cooperatively coupled.

International Business Course

The International Business Program develops coordinators and project managers who have advanced technical knowledge related to business administration and practical abilities for business and who are engaged in the Sea of Japan Rim Region business.

Maritime System Engineering Course

The Maritime System Engineering Program develops human resources who can play a role for system creation to connect lands and ships for new logistics, new transportation systems and new plants, based on in-depth and systematic learning.

5. Faculty Members List

Department of Mechanical Engineering

Status	Academic Credentials	Name	Subject
Professor	Ph.D.	INOUE Makoto	Nonferrous Metals
Professor	Ph.D.	OKANE Masaki	Strength of Materials
Professor	Ph.D.	SASE Naoki	Mechanical Elements and Designing
Professor	Ph.D.	TAKAHASHI Katsuhiko	Metallurgical Engineering
Professor	Ph.D.	TERANISHI Tsunenobu	Heat Transfer Engineering
Associate Professor	Ph.D.	ASAJI Toyohisa	Practice of Engineering Mechanics
Associate Professor	Ph.D.	IZAWA Masaki	System Design
Associate Professor	Ph.D.	KITA Masao	Fundamentals of Materials Science and Engineering
Associate Professor	M.S.	MASUYAMA Keiichi	Fundamentals of Mechanical Drawing
Associate Professor	Ph.D.	SAKAMOTO Yoshinori	Environmental Strength II
Associate Professor	Ph.D.	SHIRAKAWA Hidemi	Fluids Engineering
Associate Professor	Ph.D.	TOSHIMA Takeshi	Materials Properties II
Associate Professor	Ph.D.	YOSHIKAWA Fumie	Mechanical Engineering Measurement
Assistant Professor	Ph.D.	TAJIRI Tomoki	Control Engineering

Department of Electrical and Control Systems Engineering

Status	Academic Credentials	Name	Subject
Professor	Ph.D.	NISHI Toshiyuki	Electromagnetism I
Professor	Ph.D.	NISHIDA Hitoshi	Fluid Dynamics I
Professor	Ph.D.	SAKURAI Yutaka	Electrical Engineering Materials
Professor	Ph.D.	SATO Keisuke	Electric Machine I, II
Professor	Ph.D.	SHIBATA Hiroshi	Strength of Materials I, II
Professor	Ph.D.	TAKADA Eiji	Instrumentation Engineering
Associate Professor	Ph.D.	FUJISAKI Akihiro	Applied Physics I, II
Associate Professor	M.S.	FURUKAWA Hiroto	Electric Circuit I · II
Associate Professor	Ph.D.	IKEDA Shinji	Electronics
Associate Professor	Ph.D.	IKEDA Hidetoshi	Robotics II
Associate Professor	Ph.D.	ISHIDA Fumihiko	Fundamental Information Technology
Associate Professor	Ph.D.	KANEKO Shin-ichiro	Robotics I
Associate Professor	Ph.D.	MOMOSE Noboru	Fundamentals of Mechatronics
Associate Professor	Ph.D.	TADA Kazuhiro	Electronic Circuit I
Assistant Professor	Ph.D.	KITAMURA Takuya	Control Engineering II
Assistant Professor	Ph.D.	WATANABE Hidenori	Introduction to Electrical Engineering

Department of Applied Chemistry and Chemical Engineering

Status	Academic Credentials	Name	Subject
Professor	Ph.D.	GOTO Michimasa	Biochemistry I
Professor	Ph.D.	KAWAFUCHI Hiroyuki	Organic Chemistry IV
Professor	Ph.D.	KAWAI Takae	Physical Chemistry I
Professor	Ph.D.	TAFU Masamoto	Eco-materials
Professor	Ph.D.	TAKAHIRO Masahiko	Applied Physics I
Professor	Ph.D.	YASUDA Kensei	Inorganic chemistry
Associate Professor	Ph.D.	MANAKA Atsushi	Experiments in Analytical Chemistry
Associate Professor	Ph.D.	MINEMOTO Yasumasa	Applied Mathematics I
Associate Professor	M.S.	MORITA Yasufumi	Genetic Engineering
Associate Professor	Ph.D.	NAKAJIMA Eiji	Basic Chemical Engineering
Associate Professor	Ph.D.	SHINOZAKI Yukiko	Molecular Biology
Assistant Professor	Ph.D.	FUKUDA Tomohiro	Organic Chemistry I
Assistant Professor	Ph.D.	MORI Yasutaka	Polymer Chemistry
Assistant Professor	Ph.D.	SAKONO Naomi	Physical Chemistry II
Assistant Professor	Ph.D.	TAKAMATSU Saori	Analytical Chemistry II
Assistant Professor	Ph.D.	YAMAGISHI Masakazu	Organic Chemistry I

Department of Electronics and Computer Engineering

Status	Academic Credentials	Name	Subject
Professor	Ph.D.	ASO Tsukasa	Communication Systems
Professor	Ph.D.	MIZUMOTO Iwao	Electrical Communication
Professor	Ph.D.	SHINA Toru	Electromagnetism
Professor	Ph.D.	SHINKAI Junko	Discrete Mathematics
Professor	Ph.D.	SHINOKAWA Toshiyuki	Computer Structure
Professor	Ph.D.	TSUKADA Akira	Electric Circuits
Associate Professor	Ph.D.	AKIGUCHI Syunsuke	Operating System
Associate Professor	Ph.D.	FURUYAMA Shoichi	Computer Engineering
Associate Professor	M.S.	HAYASE Yoshikazu	Discrete Mathematics
Associate Professor	Ph.D.	MATOBA Ryuichi	Applied Mathematics
Associate Professor	Ph.D.	OGUMA Hiroshi	Digital Signal Processing
Associate Professor	M.S.	YAMAGUCHI Akifumi	Electric Circuits
Associate Professor	Ph.D.	YOSHII Yotsumi	Applied Physics
Assistant Professor	Ph.D.	ITO Nao	Electric Circuits
Research Associate	M.S.	KADOMURA Hideki	Experiments on Computer Engineering

Department of International Business

Status	Academic Credentials	Name	Subject
Professor	M.A.	HASEGAWA Hiroshi	Financial Accounting
Professor	Ph.D.	NARUSE Yoshinori	Management Science
Professor	Ph.D.	NISHIHARA Masahiro	An Introductory Course in Cross-cultural Studies
Professor	Ph.D.	SHIMIZU Makoto	Marketing Strategy
Associate Professor	M.A.	EBIHARA Tsuyoshi	Business Chinese
Associate Professor	M.A.	OGATA Kaoru	Business Korean
Associate Professor	M.A.	OKAMOTO Katsunori	Socio-economic History of the Japan Sea Rim
Associate Professor	M.A.	MATSUBARA Yoshihiro	Employment Law
Associate Professor	Ph.D.	MIYASHIGE Tetsuya	Strategic Management
Associate Professor	Ph.D.	MIYAZAKI Izumi	Business Russian
Associate Professor	Ph.D.	MURAYAMA Masako	Logistics Management
Assistant Professor	Ph.D.	HATAKEYAMA Toshihiro	International Business
Assistant Professor	Ph.D.	SHIOMI Kosuke	Management Accounting
Professor(Temporary)	M.A.	TACHI Kiyoshi	Shipping

Department of Maritime Technology

Status	Academic Credentials	Name	Subject
Professor	Ph.D.	CHIBA Hajime	Marine Meteorology
Professor	Ph.D.	ENDO Makoto	Naval Architecture
Professor	Ph.D.	HACHIGA Tadashi	Electrical/Electronics Engineering
Professor	Ph.D.	HOMAE Tomotaka	Mechanics
Professor	Ph.D.	MIKAMI Hiroshi	Steam Engineering
Professor	Ph.D.	MIZUTANI Junnosuke	Engineering Materials
Professor	Ph.D.	NAKATANI Toshihiko	Introduction to Navigation
Professor	Ph.D.	TOGA Shinji	Applied Navigation Mechanics
Professor	Ph.D.	YAMAMOTO Keiichiro	Power Electronics
Associate Professor	M.S.	KAWAI Msashi	Positioning System
Associate Professor	M.A.	SASAYA Keiji	Maritime Safety Engineering
Lecturer	Ph.D.	MAIWA Kazuyuki	Fluid Mechanics
Assistant Professor	Ph.D.	KYODEN Tomoaki	Industrial Thermodynamics
Assistant Professor	M.S.	NISHII Noriko	Maritime Traffic Law
Assistant Professor	A.S.	SASAJIMA Shiro	Practical Marine Engine System
Assistant Professor	M.S.	YAMADA Keisuke	Internal Combustion Engine Engineering

School Training Ship WAKASHIO-MARU

Status	Academic Credentials	Name	Subject
Captain	A.S.	NAKAGAWA Hiroshi	Training on Board
Chief Engineer	A.S.	SASAKI Tadashi	Training on Board
Chief Officer	M.A.	HASHIMOTO Shintaro	Training on Board
First Engineer	A.S.	YAMATANI Naohiro	Training on Board

Department of General Education

[Hongo campus]

Status	Academic Credentials	Name	Subject
Professor	M.A.	AOYAMA Akiko	English Expression I
Professor	M.A.	HASEGAWA Takayuki	Advanced Mathematics
Professor	M.A.	HIBI Naohiro	Physical Education
Professor	B.A.	TAKAKUMA Tetsuya	Comprehensive Japanese
Professor	M.A.	TOMITA Takashi	Comprehensive English III
Professor	Ph.D.	TSUMORI Nobuko	Chemistry
Professor	M.A.	MIYAZAKI Shinya	Philosophy I
Professor	Ph.D.	YAMAKOSHI Hitoshi	Physics
Associate Professor	Ph.D.	ADACHI Mayuko	Comprehensive Japanese
Associate Professor	Ph.D.	HASHIMOTO Itsuko	Calculus
Associate Professor	M.S.	KAWAHARA Osamu	Mathematical Analysis
Associate Professor	M.A.	TAKAGOSHI Yoshikazu	Comprehensive English II
Assistant Professor	M.A.	NIKI Yasuhiro	Physical Education
Assistant Professor	Ph.D.	OGAWA Noriko	English Practice III
Assistant Professor	Ph.D.	YOKOYAMA Kyoko	History
Professor(Temporary)	M.A.	TATENO Akira	English Expression II

[Imizu campus]

Associate Professor	Ph.D.	OTA Takao	Engineering Mechanics

6. Office of Product Development and Community Outreach

In April 2015, we developmentally integrated the former head office for regional human resource development and the former head office for product development and established the head office for product development and social contribution. The head office consists of a Solutions Center, Innovation Center and International Exchange Center under the authority of the president, director of the head office. Each center has promoted advancement of education and research, social contribution activities and international exchange activities that the National Institute of Technology, Toyama College seeks to fulfill in coordination and cooperation with each center, in order to maintain its original charter. The head office has made efforts to develop practical human resources with extensive internationality and creativity by actively promoting product development operations to meet the needs of local areas as well as through coordination and cooperation with local communities and companies. As a leader of higher professional schools in Japan, we make every effort to contribute to local industry development and regional activation, taking advantage of our accumulated knowledge in basic research, technology development and educational practical training.

■ Solution Center for Product Development

Demands for product development based on advanced technologies are increasing. For example, technical innovation to address environmental and energy issues, automation of road transportation systems, expectations for the evolution of ICT and the creation of various service systems using big data and advancements in robot technology and expectations for expanded applications in the medical and welfare fields.

The Solution Center is an organization that was newly launched as a base of product development, social contribution activity and regional cooperation at our educational institution in order to immediately address such issues. Based on the needs of industry, the center has promoted multidisciplinary research beyond the framework of departments and Advanced Courses and voluntarily and agilely conducts activities related to the entire process of “manufacturing” (planning, proposal and manufacturing).

We have made consistent efforts in our support of solutions to technical issues and promotion of product development in local areas through a series of activities mentioned above. In particular, we have responded to the design of trial products and manufacture, measurement / evaluation, improvement of equipment / devices and technical consultation in the fields of machinery, electricity / electronics and control / information using measuring instruments and processing machines, various analysis software owned by our educational institution. We also continue to make preparations for comprehensive support of product development and business improvement in order to conduct market trend (consumer needs and trends) surveys, marketing, business consultation and other initiatives.

We will also make efforts to pass on and develop technologies and to develop human resources truly required in local areas. Creative “manufacturing” responding to a new generation and superior engineers who can support such manufacturing are required. To develop human resources who have a high sense of ethics and technical capability and play a role as the next generation, we will develop educational programs and plan engineer development seminars to improve product development capacity. Although a school has an obligation to produce engineers and business persons who support communities and companies as its graduates, in addition to this, we are committed to actively engage in the provision of new competitive technologies and the development of human resources for local companies.

Product development seminar

Support for issue resolution of aluminum casting finishing

■ Innovation Center for Cooperative Research

The Innovation Center for Cooperative Research is an organization that was established to support improvement of education and research abilities of our teaching staff and advancement of our research activities. Main operations include support for acquisition of competitive funds and promotion of collaboration with companies, local governments, other higher professional schools, universities (colleges) and other research institutions. The center has implemented measures to increase the research level of our teaching staff such as holding of “Green Innovation Forums” in order to organize research projects and seek collaboration with local communities and other institutions as well as subsidize individual research. In joint research projects with companies and contracted research, the center will be expected to play a central role as coordinator.

The center aims to initiate research activities at our educational institution by these activities of “support,” “improvement” and “connection” to increase the level of graduation work and special research of students and enhance the willingness of students.

This is because experience in research collaboration with teaching staff stimulates students and makes a significant

contribution to the enhancement of awareness in voluntary ingenuity. We are certain that these activities at the center will lead to the development of practical and creative engineers who can meet the needs of the local industry.

The center has also promoted collaboration with other national colleges in the Tokai and Hokuriku districts. Through joint presentations at exhibitions and joint implementation of a small hydroelectric generation idea contest, the center has made efforts to increase the research and education collaboration levels.

Practices and operations related to intellectual property such as patents and utility models are important roles of the center. The center has committed itself to not only promotion of creation, protection, control, evaluation and utilization of intellectual property at our educational institution but also educational activities on intellectual property in collaboration the national colleges in the Tokai and Hokuriku district.

Small hydroelectric generation idea contest

Center for International Education and Research

Along with globalization, social systems are being forced to undergo change. Japanese companies have promoted globalization to respond to declines in domestic demand and changes in international situations. It has become common endeavor to develop business with emerging countries with significant economic development or to develop unexplored overseas markets. It is also essential to establish and operate offices and manufacturing bases in foreign countries. Human resources who lead local communities from a global perspective are in high demand.

In response to such changing situations, higher professional schools in Japan have made efforts to promote education that cultivates internationality, encouraging development of creative engineers and business persons. Higher professional schools aim to develop human resources who can understand and communicate with people from different cultures, human resources who can accurately assert themselves while cooperating with people and global human resources who can contribute to the development of a sustainable society. Of course, our educational institution has conducted various activities to develop engineers and business persons who deserve to be next-generation leaders and can respond to urgent issues face-to-face.

The Center for International Education and Research at our educational institution was prepared as a base organization to support these activities and has made significant efforts. In order to develop students with international perspectives, internationality and communication skills appropriate for global society, and promote overseas research and study of faculty members, the center has extended further globalization in education and research. In addition, it has actively enhanced language education, acceptance of short-term students from foreign countries, support for language training and overseas internships for Japanese students. Furthermore, the center has promoted holding international symposiums and implementation of international joint research in collaboration with overseas universities and local companies, and the conclusion of international exchange agreements. The center desires to be rooted in local communities and contribute to the development of highly-professional human resources who have international perspectives.

7. Facilities

Library and Information Center

Library

The libraries are located on the Hongo Campus and Imizu Campus. The Hongo Library has about 75,000 books in the fields of science and engineering and about 870 kinds of magazines, and Imizu Library has about 79,000 books in the fields of merchant marine, electronic information and international business and about 1,000 kinds of magazines for study, education, research and other topics. Also over 10,000 titles of electronic journals are available at both campuses. In the libraries, an extensive English reading corner, certification exam exercise book corner for employment / admission support, etc., and audiovisual materials (DVD, etc.) are available.

The libraries are open not only to our own students and teaching staff but also to the public as well.

Library Hours

	Hongo Library	Imizu Library
Academic Period	Mon. - Fri. 8:30-21:00	Mon. - Fri. 9:00-19:00
	Sat. 10:00-15:00 During examination period 10:00-17:00	Sat. 13:00-17:00
Vacation Period	Mon. - Fri. 8:30-17:00	Mon. - Fri. 9:00-17:00
	Closed on Sat.	Closed on Sat.

Information Center

The Information Center is located on the Hongo Campus and Imizu Campus, and offers introductory education and advanced professional education on information processing education, support for research of teachers and students and job performance of teaching staff, etc., network environments and information services.

The center also has 7 seminar rooms in total at both campuses as shared facilities, and administers more than 300 PC terminals, an internal network and external network (SINET).

The Information Center is available after class as well, and students from all departments take advantage of the Internet, e-mail, application software for submission of assignments, and graduation work.

Marine Training and Research Center, Training Ship “Wakashio Maru”

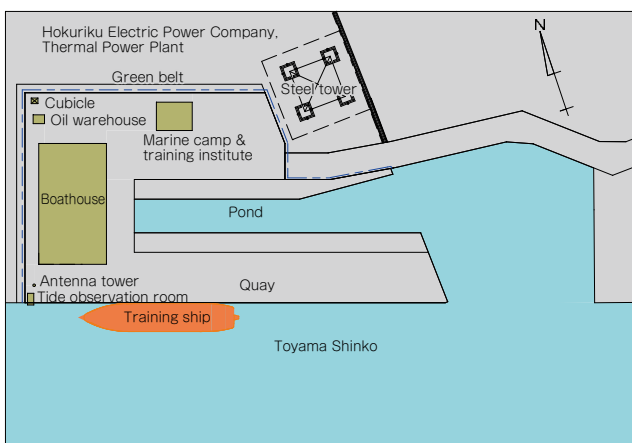

Imizu Campus

Marine Training and Research Center(6-4, Horiesengoku, Imizu City)

In March 2015, the center was relocated to a newly built site (6-4, Horiesengoku, Imizu City) 3 kilometers away from Imizu Campus. The center is located on the north side of the east end of Toyama Shinko Port (within the Fushiki-Toyama Port, Shinminato District), and the entrance is near the Nakanoguchi Intersection on Route 415. The site area is 11,232m². Buildings include a boathouse, marine camp & training institute, oil warehouse and tide observation room, equipment such as antenna tower, overhead traveling crane, 150m dedicated quay (the training ship “Wakashio Maru” is moored there), pond and floating dock.

The center is mainly used for practical training conducted by the Department of Maritime Technology, the campus-wide cutter race competition, and extracurricular programs including the yacht club and the boat club (cutter club). The center is also used for extension lectures open to local youth and citizens and for research and study by companies and research institutes, etc.

The boathouse includes lecture rooms and technique & work rooms. Also observation equipment for experiments and research, models necessary for maritime education, lifeboats, yachts, cutters (small boats) and other related equipment are stored and used here.

Welfare Facilities

Hongo Campus

Student lounge

The student lounge on the first floor of the library is a multipurpose space where students can conduct study sessions, meetings and seminars. The lobby of the library also provides a space for relaxation.

Lodging Center for Extracurricular Programs

This center serves as a rest and sleep facility during special sports sessions or for other extracurricular programs. Teachers lodge with the students and provide guidance in their meetings and other activities.

Imizu Campus

Nagonoura Hall.

The cafeteria, which can seat 100 persons, is located on the first floor. There is a conversation corner next to the cafeteria. The second floor consists of a multipurpose assembly room, a training room for meetings and events, and a student council room for members to coordinate and conduct activities. In addition, there is an art room and a large Japanese-style room (26m²) that provides a spacious atmosphere for Sado and other cultural activities. Adjacent to the hall is a co-op shop that sells not only food and drink but also school supplies and coordinates various school-related examinations like TOEIC and Eiken. The co-op helps to enhance and contribute to a comfortable student life.

Student Counseling Room

The director, counseling staff (teaching staff), nurse, and counselors (clinical psychologist) are available in the student counseling room. The staff seeks to provide solutions for various consultations on school life including work and career, relationships with friends, clubs, and consultations on mental health. Also the room can accept consultations from parents (guardians) as well as students.

The office hours of the student counseling room at each campus are as follows:

Hongo Campus

Student Consulting Room (next to the office of Academic Affairs)	Mon. - Fri.	Counseling staff	15:30 - 17:00
	Tue., Wed.	Counselor	13:00 - 17:00
Dormitory	second Tue.	Counselor	17:00 - 21:00
School Nurse's Office	Mon. - Fri.	Nurse	8:30 - 17:00

Imizu Campus

Student Consulting Room (Next to the School Nurse's Office)	Mon. - Fri.	Counseling staff	15:30 - 17:00
	Mon., Wed.	Counselor	Mon. 14:30 - 17:30 Wed. 13:30 - 17:30
School Nurse's Office	Mon. - Fri.	Nurse	8:30 - 17:00

Dormitory

The dormitories were built with convenience of class attendance in mind. The dormitory at the Hongo Campus is called "Gyogaku-Ryo" and the dormitory at Imizu Campus is called "Wakai-Ryo".

Unlike an "arbitrary dormitory" at a university or boarding house, these dormitories are featured as "educational dormitories" and are intended not only to provide a place to live for students but also develop the moral tone to value social order and ethics through group living as part of our education. Unique annual events hosted by student groups are planned in order to promote friendships between dormitory students. Therefore, conversations with friends and relationships with senior students that are difficult from home are typical at dormitories, resulting in a place for communication between people.

Gyogaku-Ryo (Hongo Campus)

As of May 1, 2015

Department \ Grade	1st	2nd	3rd	4th	5th	Total
Mechanical Engineering	12 (3)	9	11 (1)	11 (1)	5	48 (5)

9. Collaboration with Local Communities

■ Technology Promotion Association

National Institute of Technology, Toyama College Foundation for Advancement of Technology was established for the purpose of creating intellectual resources in industry-academia-government collaboration, activation of local economies and subsidization necessary for education through research exchanges based at our college. The number of member companies totals 201 and the number of individual members totals 18 (as of May 1, 2015).

The organizing committee of the foundation for the advancement of the technology promotion association was launched in August 2005 and then the foundation was established in October 2005. It was reorganized in October 2009 and evolved into its current form at the annual meeting in December 2009 after the National Institute of Technology, Toyama College was established. Chairmen since its foundation are:

- 1st Chairman: Ichiro Tanaka, President, TANAKA SEIMITSU KOGYO CO., LTD.
(Term: October 24, 2005 – October 31, 2007)
- 2nd Chairman: Kaneyoshi Miyano, President, Tateyama Machine Co., Ltd.
(Term: November 1, 2007 – December 13, 2009)
- 3rd Chairman: Koichi Kawamura, President, ASAHI PRINTING CO., LTD.
(Term: December 14, 2009 – October 27, 2011)
- 4th Chairman: Noboru Matsuda, President, FINECS CO., LTD.
(Term: October 28, 2011 – October 31, 2013)
- 5th Chairman: Toshikazu Todo, President, TODO KOGYO CO., LTD.
(Term: November 1, 2013)

Examples of business for member companies are shown below as business of Foundation for the Advancement of Technology.

- Cooperative business for human resources development
As an independent business of “small to medium-sized company human resource development business utilizing higher professional schools” implemented in the fiscal year of 2007, an “energetic and fresh engineer development program” is implemented every year. In fiscal year of 2014, the program was held twice as a human resources development business by company – problem-solving skills development course – and the total number of participants was 53.
- Lecture presentation
 - Held a lecture presentation under the title “Current status and issues of electricity business – on the basis of the Great East Japan Earthquake” by Masato Kontani, assistant general manager of Marketing & Sales Division, Managing Executive Officer, Hokuriku Electric Power Company (on October 28, 2011)
 - Held a lecture presentation under the title “Production technology and human resources development in the age of globalization” by Yoshikazu Nakahama, Senior Specialist in the Tokyo Office, DAIKIN INDUSTRIES, Ltd. (on October 26, 2012)
 - Held a lecture presentation under the title “Development of human resources who will create the future of Japan – Recent trends in universities and higher professional schools –” by Sotomi Ishihara, President, National Institute of Technology, Toyama College (on October 31, 2013)
 - Held a lecture presentation under the title “To create a new future for higher professional schools – confronting discontinuity of environmental change –” by Seiji Kino, Director, National Institute of Technology (on October 31, 2014)

Examples of support business by the Foundation for the Advancement of Technology are as follows:

- Support for student internship business
- Provision of a meeting place for member companies and teaching staff / students of the National Institute of Technology, Toyama College
- Support for education and research of students of the National Institute of Technology, Toyama College by visiting professors and senior fellows
- Support for career education
- Company research workshop to introduce member companies to students
- Subsidization for joint research

■ Open Lectures (in the school year of 2014)

Target participants	Number of open lectures
Engineers / Specialists	1 lecture
Junior high school students	18 lectures
Elementary school students / Junior high school students	2 lectures
Preschool children	1 lecture

10. Research Work

■ Adopted Grants-in-Aid for Scientific Research

□ Grant Programs for Scientific Research from the Ministry of Education, Culture, Sports, Science, and Technology

Amount: Unit 1,000 Yen

11. International Exchange Programs

Academic agreements with international institutions

Exchange with Kyung Hee University (South Korea)

Our college concluded an academic exchange agreement with all colleges of Kyung Hee University (Seoul City and Suwon City in South Korea).

The first academic exchange with Kyung Hee University was the conclusion of an academic exchange agreement with the Environmental Applied Chemistry Department of Kyung Hee University (in Suwon City, South Korea). The conclusion of an academic exchange agreement with all colleges of Kyung Hee University enabled student exchange and research exchange in all departments of our college encompassing the engineering, business and maritime fields.

Exchange with Northeastern University (China)

The first international academic exchange was the conclusion of the agreement between one of our former colleges "Toyama National College of Technology" and Northeastern University (Shenyang, Liaoning, China) in December, 2003. Along with integration of our colleges, this agreement was sealed again in October 2010 for the purpose of deeper international exchange.

Northeastern University is a top-ranking university in China. Research exchanges such as accepting visiting researchers of Northeastern University for a short period or sending our faculty members as a long-term researcher to Northeastern University have been conducted.

Exchange with Kauai Community College, University of Hawaii (U.S.A)

In October 2009, an agreement between our college and Kauai Community College, University of Hawaii in U.S.A (KCC) was concluded. And in November 2010, a framework agreement was concluded between Kauai Community College, University of Hawaii and 5 higher professional schools in Japan (including 4 more higher professional schools that have a Department of Maritime Technology). We have made efforts to promote international exchange programs for faculty members, sharing and improvement of technical knowledge related to maritime affairs and collaboration in technology and education.

Exchanges between students of Kyung Hee University and students of our college

Dr. Istvan Barsony, Director of MFA (left) and Dr. Sotomi Ishihara, President of our college (right) (International academic exchange agreement was concluded in January 2015)

At present, while our students take international internship courses and conduct cross-cultural activities at KCC, KCC students study at our college for a short period.

Exchange with South Eastern Regional College (Northern Ireland, the UK)

Our college sealed an exchange agreement with South Eastern Regional College, located in Northern Ireland the UK, in March 2010, and has conducted international internship programs for students in the Advanced Courses. We have continued mutual visits of faculty members, promoting exchange activities.

Exchange with King Mongkut's Institute of Technology Ladkrabang (Thailand)

Our college sealed an exchange agreement with King Mongkut's Institute of Technology Ladkrabang, Thailand, (KMITL) that is a framework agreement school of the National Institute of Technology, in August 2013, and have mutually accepted short-term international students. And we have invited faculty members of KMITL to implement lectures for students.

Exchange with Institute for Technical Physics and Materials Sciences, Hungarian Academy of Sciences and Pázmány Péter Catholic University (Hungary)

Our college concluded international academic exchange agreements with the Institute for Technical Physics and Materials Sciences, Hungarian Academy of Sciences (MFA) in January 27, 2015 and with Pázmány Péter Catholic University (PPCU) in February 18.

Both institutions are located in Budapest. MFA is an academic research institution dedicated to researching nanomaterials and nano systems, and is an institution respected for its high level of research in Europe. PPCU is one of the oldest universities in Hungary and was established 360 years ago. PPCU aims to launch academic fields that will serve actively in the industry of the 21th century such as information engineering and bioengineering. In the future, we will promote interchanges of faculty members and students with the aim of developing research and education in collaboration with one another.

Canoe Practical Training at KCC

Robotic Practical Training at SERC

Overseas Training Programs

An overseas training program was started in 2006 for the aim of improving students' communication skills in English through being involved in cross-cultural differences and practical experiences in foreign countries. Prior to the establishment of the overseas training program, we gave thorough consideration to the safe and smooth implementation of overseas training such as signing an agreement with international institutions and organizing a support system for the training program by faculty members.

One-year study abroad program

In 2006, our college concluded an agreement with a high school (former Malaspina High School) attached to Vancouver Island University in Nanaimo City on the west coast of Canada. Since April 2008, a one year study abroad program has been conducted.

Six-month study abroad program

Our college concluded an agreement in 2005 with University of Victoria in Canada. Since April 2006, English training for 4th year students of the Department of International Distribution (at present the Department of International Business) has been conducted through experiencing cross-cultural differences for about 5 months at the English Language Center, University of Victoria, in Victoria City on the west coast of Canada.

International Internship in Hawaii, U.S.A.

Location: Kauai Community College, University of Hawaii (Exchange agreement was concluded in 2009)

Students studying at a high school attached to Vancouver Island University

Students studying at the English Language Centre, University of Victoria

Attendee: Students in the Advanced Courses (Maritime System Engineering Program), 4th-year students in the academic department (Department of Maritime Technology)

Period: 3 weeks

Content: Maritime technical training such as Polynesia traditional navigation and English language training

International Internship in Northern Ireland, the UK

Location: Local Company and South Eastern Regional College (Exchange agreement was concluded in 2010)

Attendee: Students in the Advanced Courses (International Business Program, Control Information Systems Engineering Program)

Period: 4 weeks

Content: International Business Program: Internship and professional lectures at college (for 2 weeks, each)
Engineering Program: English language training and practical training (for 2 weeks, each)

Overseas Internship in the Southeastern Asia

Location: Thailand and Malaysia-based subsidiary of company in Toyama prefecture

Attendee: Students in the Advanced Courses, 4th-year students in academic departments

Period: 2-3 weeks

Content: Practical training

Cross-Cultural Experience

Location: Each educational institution in Canada, South Korea, Taiwan, Russia, and U.S.A. (Hawaii)

Attendee: 3rd, 4th and 5th-year students in academic departments

Period: 3-4 weeks

Content: Practical training in learning the foreign language and culture of each country

Acceptance of short-term international students

According to the framework agreement with the National Institute of Technology, we have accepted short-term international students from King Mongkut's Institute of Technology Ladkrabang since April 2012, and concluded an exchange agreement with the institute in August 2013 to further increase the number of students and expand the exchange.

We also have accepted short-term international students from Temasek Polytechnic (Singapore) and Nanyang Polytechnic (Singapore) that are comprehensive affiliated schools of the National Institute of Technology and exchange affiliated schools of our college.

International students participating in our college festival

▶ Alumni employment patterns

Core Course

Department of Electronics and Computer Engineering

NTT FIELDTECHNO. / KOUSHI INTEC Inc / SANSHO MEC Co., Ltd. / Shin Nikkei Company, Ltd. / Chubu Electric Power Company, Incorporated / TOAGOSEI Co., Ltd. / FIRST BANK OF TOYAMA / TOYOTA TECHNICAL DEVELOPMENT CORPORATION / Japanese Broadcasting Corporation / Panasonic System Networks Co., Ltd. / Hitachi Kokusai Electric Inc / Nachi-Fujikoshi Corporation / Hokuden-software. Co., Ltd. / Hokuriku Electric Power Company, Incorporated / Hokuriku Plant Services Co., Ltd. / YKK Corporation Kurobe / Toyama Prefectural

Department of International Business

Ishitomo home Co., Ltd. / ISEWAN TERMINAL SERVICE Co., Ltd. / GRAPSTONE Co., Ltd. / CAP Inc / Shin Nikkei Company, Ltd. / FIRST BANK OF TOYAMA / Nippon Express Co., Ltd. / Fushiki Kairiku Unso Co., Ltd. / Hotel Kurobe / Hokuriku Electric Power Company, Incorporated / YKK Corporation Kurobe / YKK Business Support Inc / Ishikawa Labor Bureau / Ministry of Foreign Affairs, MOFA / Ministry of Economy, Trade and Industry, METI / Ministry of Land, Infrastructure, Transport and Tourism, MLIT / Tokyo Customs / Toyama Prefectural / Toyama City Hall / Takaoka City Hall / Cabinet Office, CAO / Yokohama Customs

Department of Maritime Technology

Idemitsu Kosan Co., Ltd. / Intermodal Engineering Co., Ltd. / Ube Shipping & Logistics, Ltd. / Kawasaki Kisen Kaisha, Ltd. / Global Ocean Development Inc / JX Ocean Co., Ltd. / SHIBUYA KOGYO Co., Ltd. / Mitsui O. S. K. Lines / Shintomi Corporation / Shinnihonkai Ferry Co., Ltd. / DAIKIN INDUSTRIES, Ltd. / Taiyo Nippon Kisen Co., Ltd. / Nippon Shipping Co., Ltd. / NIHONKAI EISEN Co., Ltd. / Nippon Yusen Kabushiki Kaisha / NYK CRUISES Co., Ltd. / Hokuriku Kenko / Hokuriku Plant Services Co., Ltd. / YANMAR Co., Ltd. / UNI-X Corporation.

Advanced Courses

Control Information Systems Engineering Course

Otsuka Pharmaceutical Co., Ltd. / Sankyo Tateyama, Inc / SEIKO EPSON Corporation / Tateyama Kagaku Industry Co., Ltd. / Hokuriku Computer Graphics. / MIWA LOCK.

International Business Course

Seals Co., Ltd. / Nissei Industry Corporation. / Japan Open Systems Corporation. / PYRAMID FILM Inc / Hokuriku Computer Graphics. / Hokuriku Denki Shokai. / YKK Corporation /

Maritime System Engineering Course

Japan Drilling Co., Ltd. / Nippon Express Co., Ltd. / SANTOKU SENPAKU Co., Ltd.
